(a) Detection by system size, +3 h
Probability of Detection (POD)
system size $L = \sqrt{A}$ (km)
U-Net
flow
persistence
(b) False alarms by system size, +3 h
False-Alarm Ratio (FAR)
system size $L = \sqrt{A}$ (km)
(c) Detection against lead time, per size band
Probability of Detection (POD)
lead time (h)
flow
U-Net
scale band L (km)
(d) Horizon against system size
detection horizon $\tau(L)$ (h)
persistence: $\alpha = 0.97$
U-Net: $\alpha = 1.77$
flow: $\alpha = 1.78$
longest lead, 6 h
system size $L = \sqrt{A}$ (km)
in the fit
not fitted
